2-D Sensitivity: $\sigma_a \times \tau_l$ — P95 Transverse KF Prediction Error [µm]
Operating Envelope: P95 prediction error
($m = 8$, physical schedule — $\tau_{rem} = \tau_l$ — white dashed = 20 µm boundary)
Nominal
System latency τ_l [ms]
Process noise σ_a [m/s²]
P95 transverse prediction error [µm]
Slice at $\tau_l = 3$ ms
20 µm req.
P95 [µm]
σ_a [m/s²]
